

Supplier Onboarding and Due Diligence Standard

Defines synthetic onboarding, screening, risk-tiering, documentation, and ongoing-monitoring requirements.

Document ID	STD-SUP-2026.1	Owner	Head of Supplier Risk
Version	2026.1	Effective date	12 August 2026
Classification	SYNTHETIC INTERNAL DEMO	Source status	APPROVED SYNTHETIC CONTENT
Next review	12 February 2027	Language	English

**AGENT USE AND SAFETY
BOUNDARY**

Decision support only. Retrieve and cite this policy, distinguish it from operational facts, show source freshness, and escalate uncertainty. Never approve a supplier, create a commitment, release payment, bypass controls, disclose confidential information, or make an airworthiness decision.

SUP-001 Scope and ownership

A supplier must be onboarded before receiving a commitment unless the AOG procedure permits a narrowly controlled emergency path.

The category owner owns the business relationship; Supplier Risk owns due-diligence standards; Finance validates payment setup through a separate controlled process.

SUP-002 Minimum onboarding evidence

Collect legal name, registration evidence, ownership and control details, tax status, operating address, authorised contacts, insurance evidence, acceptance of the supplier code, and approved payment setup.

Bank-account data and credentials are confidential and are deliberately excluded from this demo dataset.

SUP-003 Screening and prohibited conditions

Perform sanctions, restricted-party, beneficial-ownership, conflicts, adverse-media, and fraud-risk checks using approved sources and reviewers.

A HOLD or unresolved material finding prevents new commitments until the accountable human owner records a resolution.

SUP-004 Risk-tiering

LOW, MEDIUM, and HIGH tiers reflect synthetic operational, financial, geographic, concentration, data, and compliance indicators. Tiering supports review frequency; it is not a legal or safety certification.

Tier	Illustrative review cadence	Typical control
LOW	Every 24 months	Core screening and document refresh
MEDIUM	Every 12 months	Enhanced financial or operational evidence
HIGH	Every 6 months	Executive owner, mitigation plan, frequent monitoring

SUP-005 Critical and MRO suppliers

Critical suppliers require continuity planning, alternate-source assessment, incident contacts, service-level ownership, and documented recovery arrangements.

For MRO parts and safety-sensitive services, authorised technical personnel must verify approved-source, traceability, release, quality, and airworthiness evidence. The procurement agent must not perform that verification.

SUP-006 Performance monitoring

Monitor on-time delivery, quality acceptance, invoice accuracy, open issues, contract performance, and remediation commitments. Investigate RED flags and repeated AMBER flags.

Performance metrics are decision evidence and do not automatically determine an award.

SUP-007 Suspension, remediation, and exit

A supplier may be suspended for unresolved screening, material breach, quality failure, fraud indicators, or unacceptable continuity risk. New awards must stop while status is SUSPENDED or HOLD.

Exit planning must address open POs, materials, data return or deletion, warranties, and operational continuity.

SUP-008 Agent boundary and escalation

The agent may summarise approved synthetic supplier records and relevant policy. It must not reveal confidential onboarding data, declare a supplier safe, or approve onboarding.

Conflicting or stale supplier status must be escalated for human verification before commitment.

Escalation route

Escalate screening holds, ownership opacity, adverse findings, critical-supplier control gaps, data-security gaps, and suspected misrepresentation to Supplier Risk, Security, Legal, and the accountable category owner.
